

Unlike traditional direct thermal labels, RevealPrint is a **chemical free, environmentally friendly** imaging technology that works with any barcode software and existing direct thermal printers.

RevealPrint is produced using **passive ingredients** that are readily available from sources in the US, eliminating any concern over supply chain disruption. RevealPrint is **human health friendly and easily recycled**.

**MAKE THE SUSTAINABLE CHOICE,
TRY REVEALPRINT TODAY!**

RevealPrint is:

- Chemical free – no leuco dye, BPA, BPS or other phenols
- Environmentally friendly – during production, use and recycling
- All materials are US sourced and readily available
- Image lasts for years with no degradation from UV light
- Water and alcohol tolerant
- Ability to add color, enabling color-on-demand at the point of printing
- Compatible with existing printers
 - Direct Thermal
 - Impact Printers
- Writable - can write on it with a ballpoint pen
- Made in America
