

Looking for a cost-effective way to streamline operations in your warehouse and distribution center?
Use **COLOR!**

RevealPrint color-on-demand labels used in your warehouse or distribution center will **save time and money**. Color attracts attention, increases productivity and lowers overall costs. Now you can use your existing thermal printer and software to highlight variable information on-demand.

Stop buying pre-printed direct thermal labels that sit on the shelf waiting to be used. **Reduce your consumables inventory** by imaging the information on-demand – with no inks or ribbons required. Use the same label format for multiple applications – **One Label, Many Options!**

APPLICATIONS INCLUDE:

Storage condition alerts

- Frozen/refrigerated

Inventory management

- Identify storage location
